How To Edit Shapes

❖ You can add and edit some **shapes** to your presentation to present your data in a visual way.

❖ Choose your favourite infographic and insert it in your presentation using Ctrl C + Ctrl V or Cmd C + Cmd V in Mac.

❖ Select one of the parts and **ungroup** it by right-clicking and choosing "Ungroup".

❖ **Change the color** by clicking on the paint bucket.

❖ Then **resize** the element by clicking and dragging one of the square-shaped points of its bounding box (the cursor should look like a double-headed arrow). Remember to hold Shift while dragging to keep the proportions.

❖ **Group** the elements again by selecting them, right-clicking and choosing "Group".

❖ Repeat the steps above with the other parts and when you're done editing, copy the end result and paste it into your presentation.

❖ Remember to choose the "Keep source formatting" option so that it keeps the design. For more info, please visit **Slideegg (Tips & Tricks)**.
